GI The title compds. (I) were prepd. Thus, 7.5 g. Et₂NH was added slowly to 9.4
 AB g. 5,7-dichloro-s-triazolo[1,5-a]pyrimidine in 100 ml. H₂O, the mixt. stirred
 2 hrs. at room temp. and 2 hrs. at 70-80.degree., the cold soln. acidified and
 filtered to give 10 g. I (R₂ = R₄ = H) (II, R₁ = Cl, R₃ = Et₂N) (III), m. 111-
 12.degree.. III (5.7 g.) was dissolved in 50 ml. BuOH, 6 g. PhCH₂NH₂ added,
 the mixt. refluxed 5 hrs. resulting in 6 g. II (R₁ = PhNH, R₁ = Et₂N), m. 146-
 7.degree. (AcOEt). Similarly prepd. were the following II (R₁, R₃, and m.p.
 given): Cl, PhCH₂NH, 178-9.degree. (EtOH); Et₂N, PhCH₂NH, 125-6.degree.
 (AcOEt); (HOCH₂CH₂)₂N, furfurylamino, 107.degree. (H₂O); Cl, PhCH₂CH₂NH, 145-
 6.degree. (EtOH); Et₂N, Et₂N, - (b0.2 165-70.degree.); piperidino (A), A,
 (monohydrate) 79.degree. (H₂O-EtOH); and I (R₂ = H, R₄ = Et); Cl, Et₂N, 79-
 80.degree. (C₆H₆); A, A, 69.degree. (C₆H₆); and R₂ = R₄ = Et, R₁ = R₃ = A,
 hydrochloride, m. 165.degree.. The compds. have coronary dilatory properties.
